## SKILLS

HTML	JAVA	C++	R
PYTHON	CSS	NODE JS	

## MY PROJECTS

### Hand Controlled AI Virtual Mouse

Short summary of your work

- Developed a hand gesture-based mouse control system using Python, OpenCV, MediaPipe, and PyAutoGUI. Implemented hand tracking for cursor movement and click actions, enabling interaction without a physical mouse.

### AI Voice Assistant

Short summary of your work

- Developed a secure, ethical AI voice assistant for voice and text commands, focusing on privacy and efficiency. Integrated speech recognition, NLP, and ML for task automation and system control.

### AI WhatsApp Bot

Short summary of your work

- AI WhatsApp Bot offers automation, entertainment, and utility features with AI and NLP. Includes NSFW detection, text-to-sticker, torrent search, group admin control features, and multi-language translation.

### AI Image Generator

Short summary of your work

- AI Image Generator creates images from text prompts using advanced AI models like Stable Diffusion and DALL-E. It offers style customization and rapid, high-resolution outputs.

## KEY ACHIEVEMENTS

### Proficiency Award in English

Achieved the Proficiency Award for securing the highest marks in English.

## SUMMARY

I'm a second-year AI and Machine Learning student with expertise in Java, C++, and R. Passionate about coding and problem-solving, I'm diving into full-stack development to build intelligent applications. I enjoy exploring complex tech concepts, researching AI, and experimenting with new programming paradigms. Always eager to learn, I strive to stay ahead in the ever-evolving tech field. My goal is to integrate AI with full-stack solutions to create impactful, adaptive applications.

## EDUCATION

### BSc Artificial Intelligence And Machine Learning

[Sree Narayana Guru College](#)

## MY PASSIONS

I've had a love for coding since a young age, fascinated by how everything around us is driven by code. Whether it's controlling drones or developing interactive web pages, I'm amazed at how even the smallest lines of code can make the world work. Web development, in particular, brings me joy creating something from scratch and watching it come to life is truly blissful. I also thrive in environments where I can connect with like-minded people who share my enthusiasm for coding and technology.
